

What is the Product of 2 Addends?

Copyright: www.mathinenglish.com

Find and fill in the product (multiplication) of two numbers given the sum of those numbers (addends). Example: if the **sum** of 2 numbers is **9** ($8+1$, $7+2$, $6+3$ or $5+4$), then the product can be **8** (8×1), **14** (2×7), **18** (3×6) or **20** (5×4).

Across

- | | |
|--------------------------------|---------------|
| 2. sum is 13 (fill in product) | 10. sum is 11 |
| 4. sum is 12 | 12. sum is 12 |
| 5. sum is 16 | 13. sum is 7 |
| 8. sum is 17 | 16. sum is 10 |

Down

- | | |
|--------------|---------------|
| 1. sum is 11 | 10. sum is 8 |
| 2. sum is 14 | 11. sum is 14 |
| 3. sum is 10 | 12. sum is 12 |
| 6. sum is 12 | 14. sum is 18 |
| 7. sum is 10 | 15. sum is 9 |
| 9. sum is 11 | 17. sum is 13 |
