

Subtracting from a whole

Shade the outcomes and complete the subtraction sentences

$$1 - \frac{1}{6} = \frac{5}{6}$$

$$\square - \square = \square$$

$$\square - \square = \square$$

$$\square - \square = \square$$

$$\square - \square = \square$$

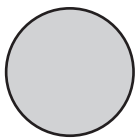

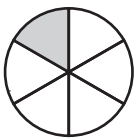

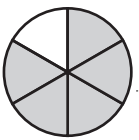

$$\square - \square = \square$$

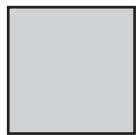

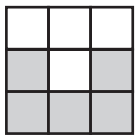

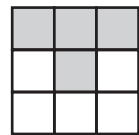

$$\square - \square = \square$$

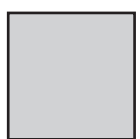

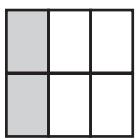

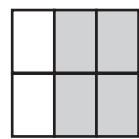

Subtracting from a whole

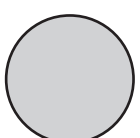

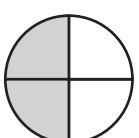

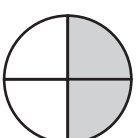

Shade the outcomes and complete the subtraction sentences

 $-$  $=$  $1 - \frac{1}{6} = \frac{5}{6}$

 $-$  $=$  $1 - \frac{5}{9} = \frac{4}{9}$

 $-$  $=$  $1 - \frac{3}{7} = \frac{4}{7}$

 $-$  $=$  $1 - \frac{2}{6} = \frac{4}{6}$

 $-$  $=$  $1 - \frac{2}{4} = \frac{2}{4}$

 $-$  $=$  $1 - \frac{1}{4} = \frac{3}{4}$

 $-$  $=$  $1 - \frac{2}{5} = \frac{3}{5}$
