$\qquad$

Find the first 2 common multiples of the following number pairs.

## 3 and 5

The multiples of 3 are: $\qquad$
The multiples of 5 are: $\qquad$
The first 2 common multiples are: $\qquad$

## 2 and 6

The multiples of 2 are: $\qquad$
The multiples of 6 are: $\qquad$
The first 2 common multiples are: $\qquad$

## 5 and 15

The multiples of 5 are: $\qquad$
The multiples of 15 are: $\qquad$
The first 2 common multiples are: $\qquad$

## 4 and 10

The multiples of 4 are: $\qquad$
The multiples of 10 are: $\qquad$
The first 2 common multiples are: $\qquad$

## Answers

Find the first 2 common multiples of the following number pairs.

## 3 and 5

The multiples of 3 are:

$$
3,6,9,12,15,18,21,24,27,30,33
$$

The multiples of 5 are: $\qquad$ $5,10,15,20,25,30,35,40,45,50,55$

The first 2 common multiples are: $\qquad$ 15 and 30

## 2 and 6

The multiples of 2 are:

$$
2,4,6,8,10,12,14,16,18,20,22
$$

The multiples of 6 are: $\qquad$ $6,12,18,24,30,36,42,48,54,60$

The first 2 common multiples are: $\qquad$ 6 and 12

## 5 and 15

The multiples of 5 are: $\qquad$ $5,10,15,20,25,30,35,40,45,50$

The multiples of 15 are: $15,30,45,60,75,90,105,120,135$
The first 2 common multiples are: $\qquad$ 15 and 30

## 4 and 10

The multiples of 4 are:

$$
4,8,12,16,20,24,28,32,36,40
$$

The multiples of 10 are: $10,20,30,40,50,60,70,80,90,100$
The first 2 common multiples are: 20 and 40
